Q2. Merging

```java
import java.io.*;
class File
{
public static void main (String []args) throws
                              IO Exception
{
    PrintWriter pw= new PrintWriter ("file 3.txt");
    BufferedReader br1= new Buffered Reader
                        (new FileReader ("file 1.txt"));

    Buffered Reader br2= new Buffered Reader
                        (new FileReader ("file 2.txt"));

    String line = br1. readLine ();
    while (line != null)
    {
      pw. println (line);
      pw. flush ();
      line = br1. read Line ();
    }
      line = br2. read Line ();
      while (line != null)
      {
        pw. println (line);
        pw. flush ();
        line = br. read line ();
      }
      System. out. println ("Merged file 1.txt and file
                    2.txt into file 3.txt");

    }
}
```
